Volunteer

Girl Coders

Girl Coders combats the gender gap by offering coding workshops to encourage young girls to have fun experiencing STEM (science, technology, math, and engineering).

My collaboration was to create the Java curriculum course for girls in grade 6 and up.

iCarros - Brazil

Software Developer | **June 2015 to January 2017**

- Created a user rank score with AWS Machine Learning which improved the filter to find potential users to apply for a loan with Itau Bank (iCarros owner)
